Code Generation in Industry

ABB Accelerates the Delivery of Large-Scale, Grid-Connected Inverter Products with Model-Based Design

“Simulink and Embedded Coder enabled us to open the door to new markets. With increased productivity from extensive simulation and efficient code generation, we have confidence in our ability to produce the systems that larger customers are asking for in the time frames they want.”

— Dr. Robert Turner, ABB
Code Generation in Academia

NASA Interns Develop Guidance, Navigation, and Control Software for Quadcopter with Model-Based Design

Model-Based Design makes both working engineers and interns at NASA MSFC more productive. The students have more fun because they can run the GNC algorithms they create in Simulink on a real processor and quickly get things done.

NASA intern working with the quadcopter vehicle and ArduPilot Mega 2.5 hardware.
Code Generation Case Study: Bruitparif Medusa
Noise monitoring distributed network
Code Generation Case Study: Bruitparif Medusa

- **Requirements**
  - Monitor noise levels and directions
  - Send live data to a central server
  - Low-power consumption device (< 5 W)
  - Minimal network traffic (< 5 kbps)

- **Solution**
  - Low-power microcontroller (STM32F4)
  - UDP communication over cellular network
  - Algorithm development with MATLAB/Simulink
    - Design and feasibility/performance analysis
    - Preparation for embedded deployment
  - Automatic Production Code Generation with Embedded Coder
  - Low memory and CPU utilization
Bruitparif - Software

2. Profiled Sections of Code

<table>
<thead>

Agenda

- Introduction
- Hardware Support Packages for MATLAB and Simulink
- Processor-in-the-Loop Execution
- Code Generation within the Internet of Things (IoT)
- Conclusion
- Questions
How do I connect MATLAB to hardware?

Since 2012: Hardware Support Packages!
C Code Generation-based Hardware Support Packages

- Texas Instruments C2000 200+ user installs / month!
- STmicroelectronics STM32F407 and STM32F746 Discovery boards
- Beaglebone Black
- Raspberry Pi 1, 2, 3 500+ user installs / month!
- Arduino (Uno, Due, Nano, Mini, Mega, too many to list!) 2000+ user installs / month!
- NXP FRDM, STM32 Nucleo boards
- Android, iOS, and more! 250+ user installs / month!

Includes:

Simulink-based HSP
- Compiler Toolchain
- Peripheral configuration I/O Blocks
- External mode
- Processor-In-the-Loop PIL framework
- Example models and documentation

MATLAB-based HSP
- Connectivity API
- Coming Soon: Code Generation
Open Hardware Revolution

Simulink Blocks
Arduino

- 17a – print/println support
- 16b – Thingspeak read, PIL, enhanced external mode
- 15a – Support from Linux

New IO Block support:
- I2C, SPI
- UDP/TCP to LEGO, Raspberry Pi, and Android/iPhone

New boards: Yun
Raspberry Pi

- 17a – New blocks: I2C, SPI, UART, TCP/IP, IMU, Pressure, Humidity, etc
- 16b - Support from Linux PC
- 16a – Pi 3 support
- 15b – Support from Mac
- 15a – Pi 2 support

Thingspeak Read/Write Support!
Linux Boards supported by MATLAB and Simulink

Raspberry Pi 1, 2, and 3

BeagleBone Black

MATLAB EXPO 2017
STM32 Board Support

- STM32 Discovery : F407 & F746

- STM32 Nucleo :
  - STM32F746
  - STM32F411
  - STM32F401
  - STM32F302
  - STM32F103
  - STM32F031
  - STM32L476
  - STM32L053

What Is ThingSpeak?

Web Site For People

Web Service for Devices
ThingSpeak

- New MathWorks web service hosted on AWS
- Lets you collect, analyze and act on data from “things”
- Over 130,000 users worldwide
- It has MATLAB for IoT Analytics
- It’s free to get started

https://thingspeak.com

- Conclusion
- Questions
Key takeaways

Hardware support in MATLAB and Simulink …

- Code generation for prototype or production workflows

- Hardware Support Packages make it easy to install and configure the necessary software

- Supports many Open Hardware Revolution boards and mobile devices (iOS, Android)

- Enables smart sensors for the Internet of Things
Déploiement embarqué et connectivité hardware avec MATLAB et Simulink
