* Running MATLAB on Solaris 10 requires that the OS have the current recommended patches. For information on which patches to install, refer to solutions 1-3UPLL6 and 1-431HK0.

R2009b is the last release to support the Solaris SPARC platform. See the note below and the platform road map for information about support for products on operating systems no longer supported.

Graphics
24-bit graphics display for Sun Solaris

License Management
Some license types require a license server running FLEXnet 11.6.1, which is provided by the MathWorks installer.
TCP/IP is required on all platforms when using a license server.

Support for Products on Operating Systems No Longer Supported
If you are enrolled in Software Maintenance Service, MathWorks will respond to technical questions and provide workarounds when possible for a period of two years from the date when MathWorks ended support for an operating system. See the platform road map for more information.
